Cesar Lopez

Head of Design & Product | AI-Driven Organizational Transformation

Design executive with 18+ years leading end-to-end digital transformation for enterprise and agency organizations, translating complex business requirements into scalable, user-centric ecosystems. Direct people-management experience leading design and development teams of up to 10, including a current team of 5 designers at AT&T, where I have personally designed 50+ service flows across internet, wireless, and related account, billing, and support activities — reducing average flow complexity from 7 steps to 3 (a ~57% reduction) within AT&T's enterprise Salesforce Customer 360 implementation. Proven track record establishing enterprise design systems and governance, and integrating advanced AI orchestration across the full product lifecycle — from ideation to deployment — to accelerate time-to-market and drive measurable business growth. Seeking a Head of Design or equivalent leadership mandate to set design vision, scale design organizations, and lead AI-driven innovation at the executive level.

Leadership & Core Skills

Leadership & Soft Skills

Stakeholder Management, Mentorship & Team Development, Cross-functional Collaboration, Data-Driven Decision Making, Storytelling & Executive Communication

Product Strategy & Business

Design Thinking, Business Metrics (KPIs/OKRs), Competitive Analysis, Market Positioning, MVP Scoping, AI Orchestrator

Advanced Craft & Execution

Systemic Design, AI Complex Prototyping, Information Architecture, Accessibility (WCAG), AI Development

Research & Discovery

User Research, Usability Testing, Data Analytics, Customer Journey / Empathy Mapping, Design Advocacy, AI Data Architecture

Experience

AT&T / Lead Sr UX Designer

Jan 2026 – Present, Atlanta GA

- **AI-Driven Experience Architecture:** Spearheaded the integration of AI and agentic models into the product ecosystem, designing intelligent interfaces that leverage predictive analytics to personalize user journeys and automate complex workflows.
- **Strategic Design Ops & AI Governance:** Directed the evolution of enterprise design systems by incorporating AI-assisted tooling and automation, optimizing the design-to-development handoff while ensuring ethical UX standards for AI interactions.
- **Cross-Functional AI Orchestration:** Led high-stakes collaboration between Data Science, Engineering, and Product teams to translate technical AI capabilities into intuitive, user-centric features that drive measurable business growth and competitive differentiation.
- **People Leadership & Mentorship:** Directly manage a team of 5 designers (direct reports), evangelizing a forward-thinking design culture and mentoring the team on the intersection of UX and Generative AI to foster continuous innovation and high-fidelity product delivery.

AT&T / Sr UX Designer

May 2024 – Jan 2026, Atlanta GA

- **Holistic CX Strategy & Friction Reduction:** Orchestrated comprehensive design strategies that aligned the Customer Experience (CX) vision across the entire consumer journey, proactively identifying pain points to eliminate friction and elevate satisfaction.
- **Omni-Channel Experience Architecture:** Designed the complete post-purchase service flows — account management, billing, payments, and support — for retail and call center within AT&T's Salesforce Customer 360 implementation, collaborating with eCommerce and Digital Engagement teams to ensure a unified brand presence across physical and digital touchpoints.
- **Flow Simplification & Personal Impact:** Personally designed 50+ flows spanning internet, wireless, and their associated product activities — change plan, manage add-ons, make a payment, order processing, move services, transfer billing responsibility, cancel line, and cancel account — reducing the average flow from 7 steps to 3, a ~57% reduction in customer and agent effort.

- **Program Scale & Business Impact:** Part of the AT&T Customer Connect (ACC) transformation team that moved agents off 5+ disconnected tools per interaction and 50+ legacy systems onto a single unified Salesforce platform — a program that achieved 8x faster time-to-market, 75% API reuse, and an estimated 2M work hours saved annually, supporting 9,000 agents serving 180M customers.
- **Strategic Alignment & Decision Influence:** Drove organizational alignment for high-stakes business decisions by evangelizing user-centered solutions to stakeholders, ensuring collaborative rollout of new product enhancements.
- **Design System Governance & Research Leadership:** Led cross-functional teams in the rigorous application of design system standards and user research methodologies, ensuring architectural consistency and data-driven integrity.

AT&T Business / UX Architect

Jan 2023 – Apr 2024, Orlando FL

- **Strategic Stakeholder Consultations:** Led high-level consultancy sessions with stakeholders and clients to synthesize complex business objectives and operational workflows into a unified architectural vision.
- **Empathetic Research & Data Synthesis:** Directed comprehensive user research initiatives — interviews, surveys, usability testing — to decode user pain points and architect data-driven personas and journey maps.
- **Information Architecture & Structural Logic:** Engineered the foundational structure of complex digital environments, producing sitemaps, product maps, and intuitive user flows.
- **Systemic Design & Cross-Functional Orchestration:** Managed the creation of wireframes, prototypes, and scalable design systems, collaborating with engineering and product leads to translate research into actionable solutions.

Integris Group LLC / Sr. Product Designer Consultant

May 2022 – Jun 2023, Orlando FL

Directed the end-to-end design lifecycle from ideation to delivery, facilitating high-impact collaboration between Product Managers, Engineering, and Business Analysts. Managed project workflows, resource allocation, and design systems, leading research and usability testing cycles to validate decisions with executive stakeholders.

Immersicom LLC / Senior UX/UI Designer & Developer

Feb 2021 – Nov 2021, Orlando FL

Spearheaded the evolution of enterprise-grade design systems, owning complex design challenges from conceptualization to deployment. Engineered reusable UI components for performance and scalability, and directed A/B testing and behavioral analysis to increase engagement and conversion.

Globe Check LLC / Senior UX/UI Developer

Jul 2020 – Jan 2021, Orlando FL

Served as Design Lead for a teleophthalmology SaaS ecosystem, steering a multi-platform solution, mobile app, and corporate website from discovery to deployment. Translated high-fidelity wireframes into clean, production-ready code and engineered a reusable front-end component library.

Brain Group LLC / Sr UX/UI Designer

Jan 2013 – Jul 2020, Bogota - Colombia / Orlando FL

- **Multi-Brand Strategic Leadership & Team Management:** Led and managed cross-functional teams of up to 10 designers and developers, directing the end-to-end design lifecycle for a diverse portfolio of agency clients — from discovery and user research through rapid prototyping and system architecture — synthesizing disparate brand identities into cohesive, high-performance digital products.
- **Cross-Functional Orchestration & Delivery:** Partnered with creative directors, product owners, and engineering teams to translate client business goals into scalable design systems and interactive prototypes, ensuring accurate, on-time delivery across web, mobile, and emerging platforms.

Trade Line S.A.S / Digital Marketing Manager

Jun 2011 – Jan 2013, Bogota, Colombia

Orchestrated omni-channel digital and social media strategies across diverse client portfolios, managing marketing budgets and media plans while conducting business gap analyses to architect end-to-end project plans and MarTech implementations.

Cloudsters S.A.S / Sr Digital Designer

Jun 2008 – Jun 2011, Bogota - Colombia

Engineered a comprehensive suite of web and print-based instructional assets and interactive digital ecosystems, translating complex technical concepts into high-engagement graphics, motion design, and multimedia learning solutions.

Education

Universidad de los Andes
B.S., Industrial Design
2003 – 2008, Bogotá DC, Colombia

Universidad de los Andes
Mechanical Engineering (Pending)
2005 – 2007, Bogotá DC, Colombia
